

Air1 is on 90.1 FM in my area. They offer support to Christians in their range by allowing us to worship God through song, outside of Church. This essential for the strengthening of our relationship with our LORD.

The local community also benefit through Air1's coordination of their listening audience for "caritable" causes, such as orphanages.

If Air1 were to be displaced by an LPFM broadcaster providing other programming, both of the above benefits would be lost, as there is no other station in our area that does the same.

Finally, the service provided by Air1 is in the public interest because it provides listeners with a God focus, rather than a self focus. Whether one is saved or not, the ethics and lifestyle of the Bible are beneficial to our local community, our state, and ultimately our nation. This can be evidenced throughout our nations history.

Do not allow a LPFM broadcaster to displaced Air1!
